# HI VIZ®

SHOOTING SYSTEMS

2015 PRODUCT CATALOG  
Shooting advancement through innovation.

**OUR MISSION:** "We make hunting and shooting easy, accurate and safe with quality products at affordable prices."

HIVIZ® SHOOTING SYSTEMS has always had a vision to improve the sport of shooting. Let's face it, when you hit what you're aiming at and experience success, you're going to have fun and enjoy it more. So we started designing and engineering our innovative line of sights and recoil pads that have now become the standard for the industry. Not only are our LitePipes™ the brightest available, we're also able to provide a variety of shapes, colors and sizes to best suit your firearm or situation. The combination of a HIVIZ® front and rear sight set gives the shooter a three-point accuracy system that's hard to beat!

At HIVIZ®, our R&D utilizes innovation to create brighter, better performing sights for the wide array of firearms on the market.

From responses we've received over the years from pros and amateurs alike, we know that our customers experience immediate results, feel more confident while shooting and are much happier with their accuracy, the accomplishments they achieve and their overall shooting experience. We offer a sight for almost everyone. If you have never ever looked down the barrel through a HIVIZ® sight then you owe it to yourself to see the dramatic difference our sights can make. When accuracy counts, you can count on HIVIZ®!

## SEE WHAT YOU'VE BEEN MISSING!

Every HIVIZ® sight is shooter-tested and guaranteed to withstand the test of time. From the sturdy steel base to the new chemical-resistant LitePipe™ material, we stand behind our products 100%, offer personalized customer service and back it up with a one year warranty.

4 2015 NEW PRODUCTS

Introducing

# LITEWAVE™ TECHNOLOGY

The strength of our overmold design with the versatility of interchangeable colors and virtually unlimited light gathering capability—from any angle.

The new LITEWAVE™ sight design from HIVIZ® features an innovative, diagonal-wave design that increases durability to the protective exoskeleton and allows for more exposed surface area for the LITEPIPE™ to gather light from all angles, for the brightest sight available.

The LITEWAVE™ sight design is an advanced innovation of our cutting-edge, third-generation sight introduced in 2014. LITEWAVE™ combines revolutionary new light gathering technology with the same skeletonized, all-steel construction and interchangeable LitePipe™ of the third generation sights.

Internal integral locking system machined into the one-piece steel sight base.

Innovative wave design collects light from all angles.

Skeletonized one-piece sight body machined from solid bar stock.

Introducing

# NITESIGHT™

TRITIUM TECHNOLOGY FOR SUPERIOR TACTICAL NIGHTTIME VISIBILITY.

The new NITESIGHT™ design from HIVIZ® features the latest technology in an ultra-durable, laser-sealed tactical tritium lamp to provide years of service and stand up to the roughest use. The white halo and tritium combine for ultra fast sight acquisition in all lighting conditions and quick target acquisition in normal lighting conditions.

White halo for quick target acquisition in all lighting conditions surrounds a glowing green tritium dot ideal for nighttime sighting.

Tough, steel sight body protects sight capsule for durable performance.

# HIVIZ<sup>®</sup> SIGHT ANATOMY

All HIVIZ<sup>®</sup> sights are built to rigid standards using only the highest quality materials, then shooter-tested to ensure they'll withstand the test of time. LitePipes<sup>™</sup> are made of a chemical-resistant material and injection molded to achieve maximum brightness and a consistent sight picture.

We believe we offer the best product available and we back it up with a one-year warranty.

END OF SWEEP  
0.020

## Optically efficient

*Recessed LitePipe<sup>™</sup> eliminates halo and reveals a crisp, clear dot.*

## Bright

*Sights are cut away in the center to allow maximum light gathering from any angle while retaining strength.*

## Precise

*Square sight profile for precision rear sight alignment.*

## Durable

*All sight bases are solid steel construction.*

## Compatible

*Dovetails are designed to fit original manufacturer's dimensions.*

## Innovative

*Ramped and serrated to reduce glare.*

## Holster friendly

*We pay strict attention to contouring all our handgun sights to be as smooth and snag free as possible.*

We maintain factory sight height to allow our front sights to be used with factory rear sights.

# SIGHT STYLES

## LiteWave™ Sights

The durability of our overmolded sights and the ability to gather light from nearly any angle, along with the versatility of interchangeable LitePipes™.

## NiteSight™

Tritium technology for nighttime visibility and quick target acquisition when you need it most.

## Overmolded Sights

Clear resin overmold locks LitePipes™ in place, adding durability for extreme uses.

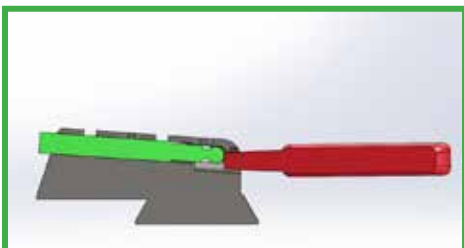

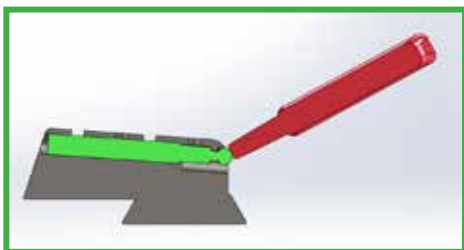

## Adjustable Rifle Sights

Developed in both front and rear sights for popular rifle models with elevation and windage adjustability and the trademark HIVIZ® light gathering sight picture.

## Changing LiteWave™ Front/Rear LitePipes™

It's as easy as inserting the pin on the key (provided), pushing the LitePipe™ down and back to release the lock and sliding the LitePipe™ out.

## SHOOTING TIP #7

### TACTICAL STANCE

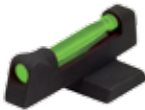

The basic pistol stance is similar to that of a boxer. If you are right handed with both hands on the pistol, your hips should be at a 45-degree angle in relation to the target. Your left leg is forward, towards the target and right leg to the back. Your legs should be placed at a comfortable distance from each other (about 12 to 16 inches) forming a triangle. You should have equal weight distribution on both legs providing a comfortable standing position. Your upper body should be parallel or square to the target with your head up and shoulders slightly forward of your body. Your nose should be located directly over your toes on your left foot. For left-hand shooters the stance is reverse of the right handed shooter.

## SHOOTING TIP #24

### CLOSE-QUARTER SHOOTING

by Mark Hotaling

In extreme close-quarter shooting, accuracy is imperative and speed is critical. When the target is under three yards away, extend the pistol straight out and with both eyes open, press the trigger while looking over the sights.

The HIVIZ® sight will greatly increase your speed and accuracy—and in this situation—instantly affirm your weapon is on target.

# SIG SAUER

## SHOOTING TIP #9

### DEFENSIVE HANDGUN SHOOTING

Front sight: Your HiViz front sight should be “razor sharp” in your vision, centered in the valley of the rear sight, and placed on the spot you wish to place your shot before you put your finger on the trigger.

Power stance: Proper balance, ease of movement, stability.

High hold: Place the web of the thumb and shooting finger high on the back strap.

Solid grip: Obtain the identical grip every time it comes in contact with a handgun frame.

# SIG SAUER

## MAGNiOptics®

Magni-Optic® technology is only available from HIVIZ® Shooting Systems.

Magni-Optic® technology aids target shooters by encouraging a two-eyes-open approach regardless of dominant eye or which hand you shoot with. The result is more rapid target acquisition, more accurate determination of distance and better hand-eye coordination. In short, you'll break more clays and break them more decisively.

The MagniComp and MagniHunter shotgun sights, manufactured by HIVIZ® Shooting Systems, combine a proven, HIVIZ® optical-grade resin LitePipe™ with a unique magnifying chamber and lens. The result is a sight that is only visible using the proper sighting eye and with the head in proper shooting position. It's the same concept as looking through a rifle scope. The only way the sight can work is if the shooter's head stays in position and the proper eye is used.

And though MagniOptic® technology is designed with cross-eye dominance in mind, the sight assists all shooters. Because the LitePipe™ is only visible when shooting form is correct, the sight helps ensure proper gun fit and consistent head position—both essentials in shotgunning.

**Magni-Comp**

**Magni-Hunter**

*If you're sighting with the proper eye, you'll see the image on top. If you're sighting with the wrong eye the sight won't appear lit.*

### Cross-eye Dominance

It is estimated that over 40% of all shotgunners are cross-eye dominant. What that means is that nearly 40% of right-handed shooters are taking directions from the wrong eye and missing to the left as a result. The incidence of cross-eye dominance for left-handed shooters has been estimated as high as 80%.

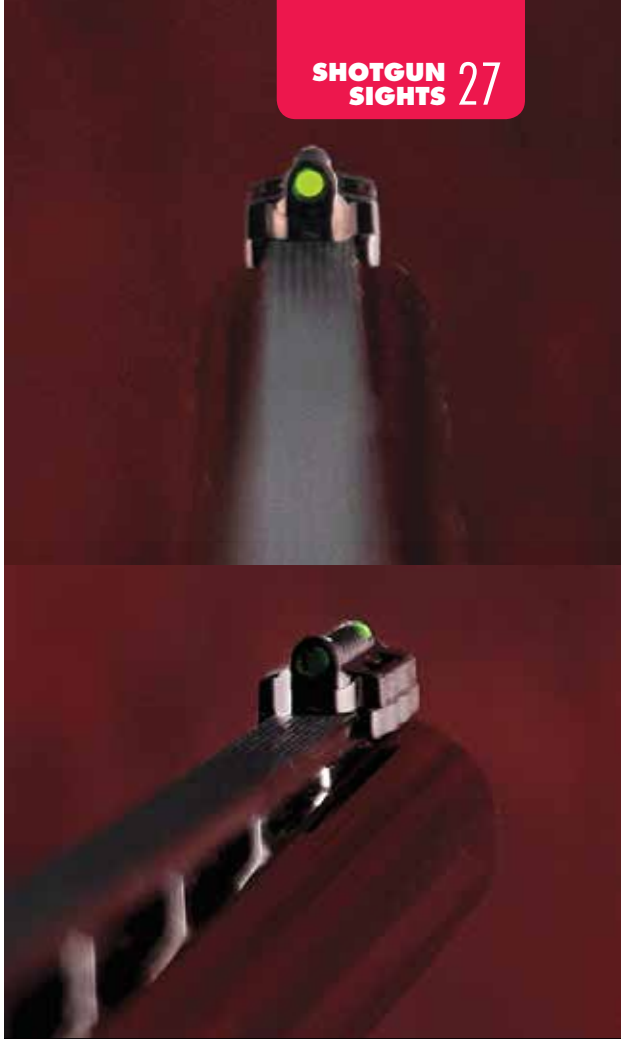

Magni-Optic® technology from HIVIZ® addresses the issue of cross-eye dominance whether or not your eye dominance has been correctly determined. Simply put, if you shoulder a gun right handed, your right eye should be doing the work and vice versa for lefties. Magni-Optic® technology ensures correct hand-eye coordination.

### Gun Fit

In addition to solving cross-eye dominance, Magni-Optic® technology can improve EVERY shooter by ensuring proper head-to-stock alignment. If you've ever looked through a rifle scope with your head out of position, you've seen the Magni-Optic® principle at work. A magnifying chamber and a focal point lens work together so that you only see the picture when your sighting eye is in proper position. Lift your head, the lights go out. Use the wrong eye to establish a sight picture, the lights go out.

### Two Eyes Are Better Than One

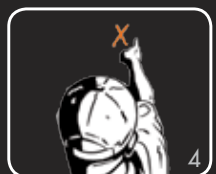

For hunters, in addition to improving hand-eye coordination, Magni-Optic® technology on the Magni-Hunter will make you a safer hunter. By helping you keep both eyes open, you'll be more aware of your surroundings including other hunters, dogs and flushing game.

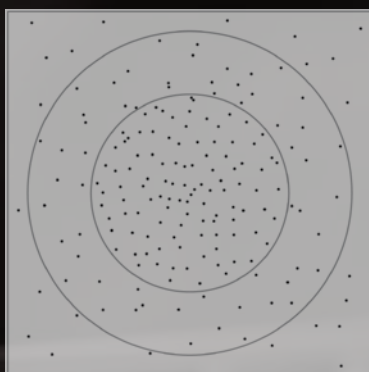

## SHOOTING TIP #4

### DETERMINING EYE DOMINANCE

With both eyes open point your index finger at an object across the room. Now close your left eye. If you are still pointing at the object, as in #3, you are right eye dominant. If it appears you are pointing to the side of the object, as in #4, you are left eye dominant. There are varying degrees of eye dominance, but this is the most basic test. Previous solutions to cross-eye dominance ranged from switching shoulders to obscuring the vision of the offending eye. Magni-Optic® technology solves it instantly.

# MAGNETIC

## SHOOTING TIP #29

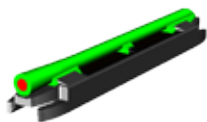

### PATTERNING SHOTGUN CHOKES

Patterning is the only way to accurately assess how your shotgun's choke is performing. Your modified choke may be giving IC patterns with your chosen load, resulting in poor hits or wounded birds. Choke charts are available online which express choke performance in terms of percentages of the total pellets in a load still within a 30 inch circle at 40 yards. Further assessment is possible by drawing a 20 inch circle (core) inside the 30 inch circle (annular ring). Comparing the number of pellets within the core vs. the annular ring will clearly show if the core is too saturated, leaving a weak annular ring or vice-versa. At least three patterns should be assessed and averaged to conclude if the choke tested is performing as expected.

## The Original Magnetic Shotgun Sight

HIVIZ® was the first to offer a magnetic shotgun sight – the year was 1996. Since then we have added many innovative magnetic sights, but after 15 years two things have remained the same. All HIVIZ® sights come with powerful rare earth magnets and multiple color LitePipes™. Don't settle for an imitation. If you want the best, get the original HIVIZ®.

# MAGNETIC

HIVIZ® MODEL		SIGHT SPECIFICATIONS	HIVIZ® PART NO.
<b>M-SERIES</b>	● ● ●	THE HIVIZ SNAP ON/OFF MAGNETIC BASE IS AVAILABLE IN THREE DIFFERENT SIZES TO FIT RIB WIDTHS FROM 11/64 TO 7/16. COMES WITH GREEN, RED AND OUR NEW TWO TONE LITEPIPE. # CAMO

## SHOOTING TIP #11

### COLD WEATHER SHOOTING

Waterfowl hunters face the problem of bulky clothing and many use a shortened stock length to accommodate their hunting parkas. But what about the shooter that needs to shoot in cold conditions early in the day, but warm conditions in the afternoon without the bulky coat?

There is a simple little trick that can help quite a bit. Just moving your front hand back an inch or two towards the receiver can make the gun feel noticeably shorter.

Using this hand position your gun will be one to two inches forward of your clothing when you start your mount.

## CAMO SERIES: The ultimate accessory for your camouflage gun.

Camouflage is not only useful but very popular. Today, almost all shotgun models are offered in a camo version, so it only seems natural to have your accessories in camo as well. We offer three of our most popular shotgun sights in HIVIZ® Camo!

## CAMO SERIES

HIVIZ® MODEL		SIGHT SPECIFICATIONS	HIVIZ® PART NO.

## HIVIZ® PROSTAFF

*Marty Fischer*

*NSCA Level Three Instructor, sporting clays course designer, outdoor writer and television host.*

All HIMIZ® screw-attach front bead replacement sights have interchangeable LitePipes™ in various colors with an all-steel base construction. They fit most common shotguns with a removable front bead and are packaged with five thread sizes to fit most thread patterns.

# BEAD REPLACEMENTS

## SHOOTING TIP #5

### FOLLOW THROUGH

There are three commonly accepted techniques for achieving forward allowance, or lead, on a moving target. They are sustained (maintained) lead, pull-away, and swing (pull) through. Which one you choose as your primary method is a matter of personal choice. However, in order to reach a higher level of ability it's a good idea to get comfortable with all three.

Some target presentations may be more effectively shot with a different technique than your primary style. The springing teal is a good example. Depending on the other target in a pair you may have to attempt the teal rising, at its apex, or dropping. A large percentage of shooters will employ swing-through on the way up, sustained lead at the apex and pull-away for the dropping teal.

During your practice sessions you should practice with the different techniques on problem presentations and see what works best for you. Regardless of the lead method you choose, follow-through is one of the most critical elements of a successful shot.

# BEAD REPLACEMENTS

HIVIZ® MODEL		SIGHT SPECIFICATIONS	HIVIZ® PART NO.
<b>SPARK III</b>	● ● ○	THE SPARK III IS THE BRIGHTEST MOST ECONOMICAL BASIC BEAD REPLACEMENT ON THE MARKET! IT COMES WITH RED, GREEN AND WHITE LITEPIPES WITH A VIEWING DIAMETER OF 0.090".	 SK2011
<b>MINICOMP</b>	● ● ●	THE MINICOMP IS A SMALLER MORE AFFORDABLE VERSION OF OUR COMPSIGHT. EASY TO INSTALL AND AMAZINGLY BRIGHT. IT COMES WITH THREE 0.100" DIAMETER INTERCHANGEABLE LITEPIPES AND STANDS 0.160 INCHES ABOVE THE RIB.	 PM2011
<b>TRICOMP</b>	● ● ○	THE HIVIZ TRICOMP ADDRESSES THE FUNDAMENTAL CONCEPTS OF TRIANGULATION, POINTING AND EYE/HAND COORDINATION AND FEATURES INTERCHANGEABLE ROUND AND TRIANGULAR LITEPIPES.	 PM2003
<b>MAGNI-COMP</b>	● ●	THE MAGNI COMP UTILIZES OUR REVOLUTIONARY MAGNI-OPTIC TECHNOLOGY TO CREATE THE SMALLEST, MOST DURABLE SIGHT ON THE MARKET FOR CORRECTING CROSS-EYE DOMINANCE.	 MGC2006
<b>FLAME</b>	● ●	THE FLAME PACKS HIVIZ BRIGHTNESS INTO A SMALLER PACKAGE THAN THE COMPSIGHT. AVAILABLE IN RED OR GREEN. LOW-PROFILE, THIS IS OUR MOST DURABLE SIGHT AND IS AN EXCELLENT CHOICE FOR TOUGH HUNTING ENVIRONMENTS.	 FL2005

# TURKEY/ DEER

## SHOOTING TIP #30

### TURKEY SHOT DISTANCE

A common mistake that causes more misses than anything while turkey hunting is letting the bird get too close. Today's choke tubes and shells are designed to be most effective at 25-30 yards and that's where we designed HiViz sights to be the perfect size on the turkey's waddles. Set your decoys at 25 yards and if the bird hangs up a bit, no problem!

**THE SHOTGUN:** The most versatile gun a hunter can own.

HIVIZ® turkey and deer front/rear sight sets fit most ribbed shotguns. They replace your shotgun's front bead with a durable LitePipe™ system that gathers light to create an incredible sight picture...even in low light conditions.

**TURKEY/DEER SIGHT**

HIVIZ® MODEL		SIGHT SPECIFICATIONS	HIVIZ® PART NO.
<b>FO2008</b>	<ul style="list-style-type: none"> <li>●</li> <li>●</li> </ul>	<p>THIS REVOLUTIONARY SIGHT WILL ALLOW YOU TO USE ONE SIGHT AND ONE SHOTGUN THROUGHOUT THE YEAR FOR ALL YOUR HUNTING AND RECREATIONAL NEEDS. *Television Host,  
NSCA All-American.*

## SHOOTING TIP #16 GUN MOUNT AND DRAG

One of the most common errors is starting the mount with the back hand. If the first move you make has both hands lifting in an upward direction the gun butt will hang-up under the armpit. The correct mount always begins with the front hand pushing toward the target. Only after the gun stock has started its forward motion should the back hand begin lifting the stock towards the cheek. Perfecting a proper mount technique will allow the stock to arrive consistently at the cheek assuring proper rib-to-eye alignment.

# TURKEY/ DEER

# TACTICAL

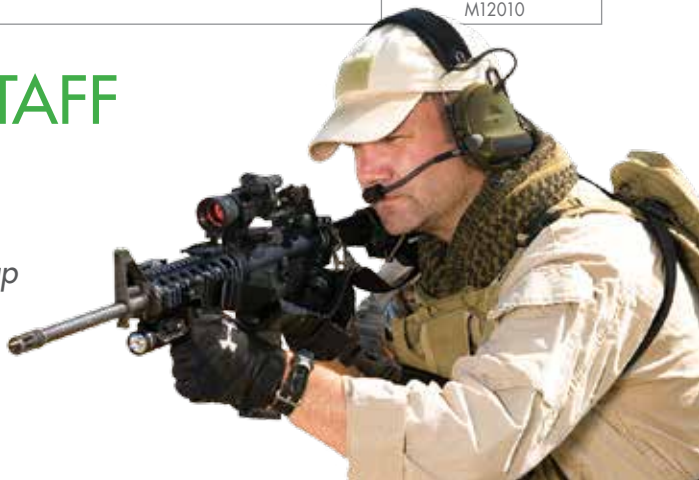

HIVIZ® MODEL		SIGHT SPECIFICATIONS	HIVIZ® PART NO.
<b>MPB-TAC</b>	● ●	INTENDED FOR USE IN LAW ENFORCEMENT, MILITARY AND HOME DEFENSE, THE MPB TACTICAL SIGHT IS THE MOST DURABLE AND VERSATILE TACTICAL SHOTGUN SIGHT AVAILABLE! THE SIGHT BODY IS CONSTRUCTED OF AN OVERMOLDED STEEL SPRING, ALLOWING IT TO STAY SECURELY ON A BARREL WITH EXTENDED MAGAZINE AND STILL BE REMOVABLE. THE INTERCHANGEABLE LITEPIPE IS ENCLOSED AND SUPPORTED TO PROTECT IT FROM BREAKAGE WITHOUT OBSTRUCTING THE TARGET. THE MPB TAC SELF-CENTERS BEHIND THE FRONT BEAD SO THERE IS NO MODIFICATION REQUIRED. RELIEFS IN THE SIDE OF THE SIGHT ALLOW IT TO FIT REMINGTON TACTICAL EIGHT SHOT SHOTGUNS WITH THE EXTENDED MAGAZINE WITHOUT INTERFERING WITH THE MAGAZINE CLAMP. FITS MOST 12-GUAGE PLAIN BARREL SHOTGUNS.	  MPB-TAC
<b>TAC1001 TAC1001M</b>	● ● ○	THE PERFECT CHOICE FOR THOSE WHO PREFER A PERMANENTLY ATTACHED TACTICAL SHOTGUN SIGHT. THE ULTRA-BRIGHT HIVIZ LITEPIPE IS FULLY PROTECTED BY A SKELETONIZED FRAME THAT ALLOWS LIGHT TO ENTER WITHOUT EXPOSING IT TO POTENTIAL DAMAGE.  THE TAPERED FRONT OF THE SIGHT FRAME/BASE IS SERRATED TO ELIMINATE GLARE TO HELP THE SHOOTER MAINTAIN FOCUS ON THE LITEPIPE. MOUNTS WITH TWO SCREWS TO ANY SMOOTH BARREL SHOTGUN. MACHINED FROM LIGHTWEIGHT, DURABLE AIRCRAFT-GRADE ALUMINUM. AVAILABLE IN TWO HEIGHTS – LOW FOR FRONT SIGHT ONLY USE AND MEDIUM FOR USE WITH ELEVATED REAR SIGHTS. FITS 12-GUAGE SMOOTH BARREL SHOTGUNS WITH REMOVABLE FRONT BEAD.	  TAC1001
<b>AR2008</b>	● ●	THE AR2008 GIVES YOU THE UNIQUE ABILITY TO INTERCHANGE OUR HIGH INTENSITY LITEPIPES (INCLUDES TWO COLORS - GREEN AND RED). THIS SIGHT HAS A DETENT PLUNGER WHICH TIGHTENS THE ENGAGEMENT BETWEEN THE SIGHT AND DETENT, ELIMINATING SIDE-TO-SIDE MOVEMENT. FITS ALL TYPES OF AR FRONT SIGHTS – FIXED OR DETACHABLE. INSTALLATION AND ADJUSTMENT CAN BE DONE EASILY WITH THE SUPPLIED WRENCH.	  AR2008
<b>AK2010</b>	● ● ○	SIMILAR TO THE AR2008 FRONT SIGHT, THE AK2010 IS BOTH DURABLE AND AFFORDABLE. THE AK2010 USES OUR UNIQUE INTERCHANGEABLE LITEPIPE TECHNOLOGY AND INCLUDES RED AND GREEN LITEPIPES. ALSO INCLUDED IS A SIGHT TOOL THAT CAN BE USED TO REMOVE THE ORIGINAL SIGHT AS WELL AS INSTALL AND MAKE SIGHTING ADJUSTMENTS FOR THE NEW SIGHT.	  AK2010
<b>M12010</b>	● ●	THE BENELLI M12010 FRONT SIGHT IS DESIGNED SPECIFICALLY TO FIT THE BENELLI M1, M2, M3, M4 TACTICAL AND THE NOVA AND SUPER NOVA TACTICAL SHOTGUNS WITH THE GHOST RING REAR SIGHT. THE M12010 FEATURES INTERCHANGEABLE RED AND GREEN LITEPIPES.	  M12010

# RIFLE

## SHOOTING TIP #28

### ADJUSTING A REAR SIGHT

One of the easiest things you can do to improve your shooting is to make sure your rear sight is adjusted for windage and elevation.

If your grouping is too far to the right, move the windage adjustment to the left. If the grouping is too far to the left, move the windage adjustment to the right. If the grouping is too high, move the elevation adjustment down.

*Grouping too far to the right*

*Grouping too far to the left*

*Grouping too high*

*Sighted in*

FITS RUGER 10/22 STANDARD BARREL, CARBINE AND TAKEDOWN MODEL.</p>	 <p>RG1022</p>

# ACCESSORIES

## SHOOTING TIP #12

### RECOIL

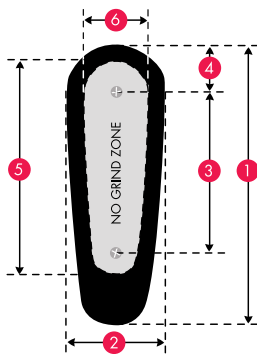

Recoil, the unavoidable result of pulling a trigger, is the shooter's arch enemy. Rifle shooters refer to "pulling the shot". Shotgunners call it "flinching". Whatever we call it, the accumulative affect of recoil causes the subconscious mind to resist subjecting the body to yet another blow. Preventing recoil issues is far easier than curing them.

A gun that fits properly and the use of light recoiling ammunition are highly recommended. However, the most common accessory available to mitigate against recoil is a good recoil pad. A good recoil pad must be soft enough to slow down and redirect the forces of recoil. It must also recover from its compressed state quickly enough to be ready for a second shot. Proper shape and texture enable a pad to mount quickly but must offer enough traction to prevent the recoil pad from moving on the shoulder between shots. All of the above attributes are incorporated into the XCoil® from HIVIZ®. Now there is no excuse for taking heavy recoil.

XCoil Pad Size			
	Large	Medium	Small
①	5.775	5.400	5.100
②	2.094	1.994	1.900
③	3.125	3.125	2.870
④	0.955	0.950	0.810
⑤	4.300	4.300	3.800
⑥	1.300	1.300	1.180

## XCoil<sup>®</sup> RECOIL PADS

XCoil<sup>®</sup> recoil pads are constructed of a composite proven superior at dampening recoil. Our testing has shown that the XCoil<sup>®</sup> absorbs felt recoil more effectively than any other recoil pad currently available.

With today's trend toward magnum and short magnum rifle calibers and 3 1/2" magnum shotgun loads, the energy pushing a projectile out the muzzle means magnum-level recoil on your shoulder. The XCoil<sup>®</sup> is the answer. XCoil<sup>®</sup>'s composition also resists slipping when shouldered for consistent gun positioning.

The HIVIZ<sup>®</sup> XCoil<sup>®</sup> is currently offered in three sizes and two different textures. These pads are grindable allowing for a true custom fit. Available in models to fit virtually any rifle or shotgun. Refer to the diagrams and selection chart at left to determine which pad is right for you.

**XCT1001** Universal - small. 1" thick, black. Fits stocks up to 5.1"H x 1.90"W

**XCT1002** Universal - medium. 1" thick, black. Fits stocks up to 5.4"H x 1.994"W

**XCT1003** Universal - large. 1" thick, black. Fits stocks up to 5.75"H x 2.094"W

**XCS1001** Sporting - small. Radiused heel, 1" thick, black. Fits stocks up to 5.1"H x 1.90"W

**XCS1002** Sporting - medium. Radiused heel, 1" thick, black. Fits stocks up to 5.4"H x 1.994"W

**XCS1003** Sporting - large. Radiused heel, 1" thick, black. Fits stocks up to 5.75"H x 2.094"W

## Slip-On Pad Selection Chart

**SP-S (Small) 1" thick Slip-On Pad fits:**  
4 1/2" x 1 3/8" up to 4 11/16" x 1 1/2" stocks

<b>BROWNING</b>	A Bolt, A Bolt Medallion (most models) BLR model 81.
<b>MOSSBERG</b>	Most wood and synthetic stocks youth 500 models.
<b>WINCHESTER</b>	Most model 94 lever actions.
<b>NEW ENGLAND FIREARMS</b>	Pardner and Handi-Rifles; most youth models.
<b>MARLIN</b>	Most Marlin lever action rifles.

**SP-M (Medium) 1" thick Slip-On Pad fits:**  
4 11/16" x 1 5/8" up to 4 7/8" x 1 11/16" stocks

<b>BAIKAL</b>	Most models.
<b>BENELLI</b>	Nova, M-1 Field, Super Black Eagle 12 ga. (non-Comfortech).
<b>BERETTA</b>	Models with 5 inch stocks.
<b>BROWNING</b>	Gold, Silver and Maxus Synthetic Stocks.
<b>MOSSBERG</b>	500, 835, 930 and 935; most wood and synthetic stocks except youth models.
<b>STOEGER</b>	Most 12 ga. models.
<b>WINCHESTER</b>	Most 1200, 1300 and 1400 models.
<b>NEW ENGLAND FIREARMS</b>	Most Pardner and Handi-Rifles models.

## Slip-On Pad

**SP-S Slip-On Pad - small, 1" thick.**  
Fits stocks from 4.5"H x 1.375"W up to  
4.6875"H x 1.5"W. See selection chart at right.

**SP-M Slip-On Pad - medium, 1" thick.**  
Fits stocks up to 4.6875"H x 1.625"W up to  
4.875"H x 1.6875"W. See selection chart at right.

## MAG STO

# HIVIZ<sup>®</sup> PROSTAFF

Members of the HIVIZ<sup>®</sup> PROSTAFF have won many major national and international championships in their respective disciplines.

The HIVIZ<sup>®</sup> PROSTAFF continues to rack up accomplishments every year. Many of the world's top competitive shooters, instructors and hunters look down the rib at a HIVIZ<sup>®</sup> sight or shoulder a HIVIZ<sup>®</sup> recoil pad as they dominate various shooting disciplines. As we continue to create innovative shooting system enhancements, our PROSTAFF will ensure their effectiveness.
